

New to the UK Market: The Battery Ladder Hoist

A smarter, safer and more efficient way to move materials on site.

I'm excited to introduce a next-generation **Battery Ladder Hoist**, engineered specifically for the demands of **solar installation, roofing, construction, and moving industries**. This cordless solution removes the hassle of trailing cables, reduces trip hazards, and keeps teams productive wherever the job takes them.

Key Features

- Unique **automatic tilting function**
- **Low-battery alarm** & over-range indication
- Robust **wire rope drive**
- **Dual-battery compatibility** for extended use
- Lightweight **28 kg drive unit**

Advantages

- High safety performance
- **Wire rope 50% longer service life** than nylon alternatives
- Portable and easy to deploy
- **Wireless operation** for maximum freedom on site

Real-World Benefits

- Lower labour costs
- Fewer accidents and reduced compliance risks
- Long operational lifespan
- Wider application potential across multiple sectors
- Significant boost in worker efficiency

If you're looking to modernise your lifting operations and improve site safety, this is a solution worth exploring.
Happy to discuss specifications, demonstrations, or integration into upcoming projects.

LADDER HOIST
